SPRINT 1-BURNDOWN CHART

SPRINT 2

SPRINT 2- BURNDOWN CHART

REFLECTIONS

1. Did your estimations reflect the actual effort?

Yes. Simple tasks had fewer points, while more complex tasks like calendar synchronization had higher points.

2. Was your backlog well-prioritized?

Yes. Core scheduling features were given **High** priority, while supporting features were given **Medium** priority.

3. How did your simulated sprint align with your plan?

The sprint followed the plan by completing the core scheduling features first, followed by outline and supporting features.

4. What insights did the burndown chart give about your team's capacity?

It showed how quickly work was completed and whether the planned workload could be finished within the sprint.
